Program Description

This program promotes environmental protection, improvement and sustainability, with a focus on protecting our water, food and the environment. Hands-on coursework includes principles and techniques used to assess water, food and the environment to meet applicable regulations and to implement needed corrective measures. Students use field projects and internships to further develop the skills and abilities necessary for careers in these fields. Graduates will possess a solid foundation for a wide range of environmental and public health career opportunities.

Career Outlook

There is a steady need for essential workers, technicians and specialists in water and air quality, food safety, field monitoring, and other related environmental careers.

Program Learning Outcomes

- Evaluate environmental health hazards (air, food, water, soil, etc.).
- Conduct both field and lab environmental sampling/monitoring according to regulatory requirements and guidelines.
